

BIOGRAPHICAL SKETCH

NAME: Herrera, Eloisa

Research ID: A-5377-2008; Orcid Code: 0000-0001-9525-5441

POSITION TITLE: (Spanish Research Council) CSIC- Research Professor

EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE (if applicable)	Completion Date MM/YYYY	FIELD OF STUDY
University of Granada, Spain	B.S	06/1995	Biology
University Autónoma of Madrid, Spain	Ph.D.	02/2000	Cancer and Aging
Columbia University, NY, USA	Postdoctoral	09/2004	Developmental Neuroscience

A. Personal Statement

I am a CSIC-Research Professor at the Institute of Neurosciences (IN) of Alicante. I obtained my PhD in 2000 working in Cancer and Aging under the supervision of María Blasco, obtaining the “Special Mention” for the best doctoral thesis and contributing to this field with relevant publications as a first author *PNAS* (1998), *EMBO J* (1999a, 1999b, 2000). Then, I moved to Columbia University (NY, USA) to work as a postdoctoral researcher in the laboratory of Carol Mason. There, I identified the molecular mechanisms underlying the emergence of binocular vision, and published several papers as first author *Development* (2004), *CONB* (2004), *Cell* (2003). Since the establishment of my lab (2005), my research has focused on three main lines: 1/ The cellular and molecular mechanisms underlying neurogenesis: We discovered that the ciliary margin zone, the most peripheral part of the embryonic retina, has the capacity to generate ganglion cells *Cell Reports* (2016) and described that neural stem cells located in the peripheral adult eye, retain neurogenic potential but are not able to generate retinoids *PRER* (2019); *Cells* (2023). 2/ The molecular mechanisms controlling axon pathfinding: We identified the transcription factor (TF) Foxd1 as important for the polarization of the mammalian retina and for the expression of the guidance molecules EphA/ephrinA *J Neuroscience* (2011). We also described that the TF Zic2 controls the receptor EphB1 to regulate axon guidance at the midline *Development* (2008) and proved that Zic2 is a general determinant of axon midline avoidance in the CNS *Neuron* (2013). We also disentangled the entire set of genes regulated by Zic2 in different cell types *J Neuroscience* (2015), and the regulatory mechanisms controlling the axonal trajectories of visual neurons *Sci Adv* (2020); *Adv Sci* (2022). 3/ The mechanisms underlying neural circuits assembly: Among the discoveries related to this line, we reported the transcriptional regulation of the serotonin transporter that modulates eye-specific refinement at the visual targets *EMBO J* (2010) and showed that the signaling mediated by EphA/ephrinA during the refinement of the visual system defines axon targeting along the anterior-posterior axis of the visual nuclei in a spontaneous activity-independent manner *J Neuroscience* (2013). We also demonstrated the existence of a retino-retinal projection likely emerged in species with retinal waves for the fine-tune refinement of visual axons *Current Biology* (2019). We have also published some technical articles including a method to electroporate the embryonic retina *BMP Dev Biology* (2007) and a procedure to perform time-lapse imaging and cell tracking of migrating cells *in vitro* and *in vivo* *Curr Prot in Neurosc* (2017). Along the years, we have also

contributed to the work of other colleagues: *J Neuroscience* (2013); *Sci Rep* (2015); *Cell Death & Differ* (2018); *Cells* (2022); *J Neuroscience* (2017); *Cell Reports* (2018); *Science* (2021); *Nat Comm* (2021); *Neuron* (2022).

My group has obtained uninterrupted funding from national and international agencies including the Career Development Award (Human Frontiers Science Program Organization, HFSP) and a Consolidator project of the European Research Council (ERC). I was deputy coordinator of the National Research Agency (AEI) (2015-2018) member of a high number of evaluation committees and panels for national and international agencies and invited as a lecturer in more than 60 scientific forums. I have supervised 10 doctoral thesis (+2 ongoing) and 7 TFMs. I belong to the Editorial Board of the journals IJMS, Scientific Reports, Molecular Brain and invited to write review articles for many journals. In 2021, I have been the coordinator of the chapter: Brain, Mind & Behavior for the “CSIC-Scientific Challenges: Towards 2030”. I was the president of the Program Committee for the SENC-2021 meeting and belong to the program committee of the IBRO-meeting (2023) and FENS-2024. Among my responsibilities at the IN, I participate as a lecturer in the PhD program, I am member of the Experimental Animal Research Commission, scientific supervisor of the Imaging Facility and coordinator of the IN-Scientific Programs.

B. Positions and Honors

Positions and Employment

2000	Predoctoral Fellow. Universidad Autónoma de Madrid
2000-02	Postdoctoral Fellow. Columbia University, NY.
2003-04	Associate Research Scientist. Columbia University, NY.
2005-07	Ramón y Cajal Scientist (Tenure-Track position). Institute of Neurosciences (IN), Alicante.
2007-16	Tenured Assistant Professor of the Spanish Research Council (CSIC), Alicante.
2016-2019	CSIC-Research Scientist, IN, Alicante.
2019-present	CSIC-Research Professor, IN, Alicante.

Scientific Management Activities, Evaluation Committees and Memberships

2005-present	Grant Evaluator for the National Agency of Evaluation (AEI).
2010-present	Grant Evaluator for the “Agence Nationale de la Recherche”, France
2010-present	Grant Evaluator for the “Fondation Recherche Medicale”, France
2012-present.	Grant Evaluator for the “Research Foundation Flanders (FWO)” Belgium.
2006-2009.	Member of the PhD Program Commission at the IN
2007-2012	Coordinator of the “Scientific Seminar Series” at the IN
2012-present	Scientific Responsible of the Imaging Facility at the IN
2015	Managing editor of the Journal "Molecular Brain"
	Member of the Editorial Board of the Journal "Scientific Reports" (Nature Group)
2015-2016	Member of the Evaluation Committee Alicia Koplowich Grants
2015-present	Member of the IN Committee on Animal Research and Ethics
2016	Member of the Evaluation Committee BBVA fellowships
2017	Associated Coordinator of the Spanish Research Agency (Neurosciences Section)
2018	Member of the Evaluation Committee “Research Fellowships La Caixa”
2017	Faculty member of F1000Prime
2018	Chair and talk-selection Committee: "Axon Guidance, Synapse Formation & Regeneration". Cold Spring Harbor, New York (USA).
	Co-director of the Cajal Training Program Course FENS-IBRO. France. 2018
2019	Organizer of the international meeting AXON-2019. Alicante, Spain. 2019
	Member of the Evaluation Committee for “Ramón y Cajal” contracts
	Reviewer for the Andalusian Research Agency
	Editor of the special issue “Retinal Ganglion Cells” in IJMS (IP: 4.2).
2021	Coordinator of the chapter “Brain and Aging” for the Spanish Research Council white paper
	President of the Program Committee-International meeting of SENC.
2022	Member of the Program Committee FENS-2024. Vienna, Austria. 2024.

	Member of the Evaluation Panel for the Cajal Training Program Courses FENS-IBRO.
	Member of the Committee program IBRO-2023. Granada, Spain 2023.
2023	Organizer of the international meeting AXON-2023. Alicante, Spain. 2023.
	Member of the Evaluation Panel for the Cajal Training Program Courses FENS-IBRO.
	Member of the Executive Committee of the Spanish Society of Developmental Biology (SEBD)

Honors

2000	PhD special mention to the best PhD thesis work
2001	Human Frontiers Science Program (HFSP) long-term postdoctoral fellow
2004	HFSP Career Development Award
	European Neuroscience Institutes (ENI) Young Investigator
2012	ERC-Consolidator Grant Holder
2014	Alberto Sols Prize to the best research work

B. Contribution to Science

Contributions on Cancer and Aging

- Martín-Rivera L*, Herrera E*, Albar JP, & Blasco MA (1998). *Co-authors. Expression of mouse telomerase catalytic subunit in embryos and adult tissues. **PNAS** 95:10471-10476. Key: A
